1. Executive summary

Meridian proposes its OmniServe platform, a cloud-native contact centre suite already running customer support for three of India's top ten retail chains. It unifies email, chat, WhatsApp and phone tickets for all 850 Sundaram agents, integrates natively with SAP S/4HANA and Salesforce Commerce Cloud, and is certified to ISO/IEC 27001:2022 and SOC 2 Type II.

2. Understanding of the requirement

Sundaram currently runs three separate tools across 212 stores and two contact centres in Chennai and Coimbatore. The tender asks for a single platform, order-level visibility for agents, EU and India data residency for customer records, and 99.9% availability.

3. Proposed solution and architecture

OmniServe runs as microservices on Kubernetes (AWS EKS) across three availability zones in Mumbai, with a warm standby in Hyderabad. Horizontal autoscaling has been load-tested to 12,000 concurrent agents and 4,000 tickets per minute. Pre-built connectors are provided for SAP S/4HANA (orders, returns) and Salesforce Commerce Cloud (customer profile, order history); single sign-on uses Azure AD via SAML 2.0.

Component	Technology	Notes
Ticketing core	Java 21, PostgreSQL 16	Multi-tenant, row-level security
Channels	Email, chat, WhatsApp, voice (SIP)	Voice via existing Avaya trunks
Integrations	SAP S/4HANA, SFCC, REST API	Delivered connectors, no custom code
Analytics	Managed Kafka, ClickHouse	Real-time dashboards, 13-month retention

4. Implementation approach, timeline and team

Delivery takes 26 weeks in four phases, with a pilot in 20 Chennai stores before the national roll-out.

Phase	Weeks	Milestone	Exit criteria
Discovery and design	1-5	Signed solution design	Integration specs approved
Build and integrate	6-15	SAP and SFCC live in UAT	End-to-end test pass rate above 95%
Pilot	16-20	20 stores live	CSAT not lower than baseline
Roll-out and hypercare	21-26	All 212 stores live	P1 incidents zero for 2 weeks

Team: one engagement director, one project manager (PMP), two solution architects, four integration engineers and two QA analysts. A RAID log is reviewed weekly with Sundaram's PMO; the top three risks (SAP interface changes, data migration quality, agent adoption) each have a named owner.

5. Commercial proposal

Item	Year 1 (INR)	Year 2 (INR)	Year 3 (INR)
Licences, 850 agents	2,55,00,000	2,55,00,000	2,55,00,000
Implementation (fixed price)	3,40,00,000	-	-
Premium support 24x7	42,00,000	42,00,000	42,00,000
Total	6,37,00,000	2,97,00,000	2,97,00,000

Three-year total: INR 12,31,00,000 excluding GST at 18%. Assumptions: prices fixed for 36 months; travel outside Chennai billed at actuals up to INR 6,00,000 a year; data cleansing of legacy tickets is Sundaram's responsibility.

6. Security, compliance and risk management

Meridian holds ISO/IEC 27001:2022 (certificate IN-27K-44120, valid to March 2028) and a SOC 2 Type II report for the period April 2025 to March 2026. Data is encrypted with AES-256 at rest and TLS 1.3 in transit; customer data stays in India, with an optional EU region in Frankfurt. Penetration tests are run twice a year by an external CERT-In empanelled firm, and a DPDP Act data processing agreement is included.

7. Support model, experience and references

Premium support is 24x7 with a 15-minute response for P1 incidents and a named customer success manager. Meridian has delivered 38 contact centre projects since 2014.

Client	Scope	Contact
Kaveri Hypermarkets	1,200 agents, SAP integration	Available on request
Harbor Foods India	400 agents, WhatsApp channel	Available on request
Metro Pharma Retail	650 agents, 99.95% uptime last 12 months	Available on request
