Sundaram Retail Pvt Ltd
Chennai

Subject: Our proposal for the customer support platform (tender SRL/IT/2026/014)

Dear Team,

Thanks for inviting us. QuickDesk is a simple, affordable helpdesk built for growing retailers, and we think we can have Sundaram live faster and cheaper than anyone else - in about 10 weeks from signing.

What you get

- One shared inbox for email, chat and phone tickets
- Canned replies, a knowledge base and basic reports
- A REST API and a CSV import for your old tickets
- SAP and Salesforce: we plan to connect using our generic webhook connector. The exact scope will be worked out during the project.

How we will do it

Weeks 1-2 account setup, weeks 3-7 configuration and ticket import, weeks 8-10 go-live for all stores together. Our team for this would be me as project lead plus two implementation consultants. We handle risks as they come up and keep you posted on WhatsApp.

Scale: our largest customer today has 60 agents and we have tested the platform with 300 concurrent agents. We are confident it will scale to 850.

Price

Item	Amount (INR)
One-time onboarding	38,00,000
Subscription, 850 seats x 36 months	4,89,60,000
Standard email support	Included
Total for 3 years	5,27,60,000

Based on INR 1,600 per seat per month. This quote is valid for 30 days. Integrations beyond the webhook connector are billed at INR 12,000 per hour. GST extra.

Security

We take security seriously. Data is hosted with a leading cloud provider and is encrypted. We are working towards SOC 2 and hope to start the audit next year. Customer data is currently stored in Singapore.

Support and experience

Support is by email, Monday to Saturday 10am-7pm IST, with replies within one working day. QuickDesk started in 2023 and has 14 retail customers so far. Happy to share references once we are shortlisted.

Looking forward to working with you.

Warm regards,
Aditya Kulkarni
